

**POCKET GUIDE:**  
Quality PSE's & Mouldings

hoppings.co.uk

**TECHNICAL INFORMATION**

Choose from three solid softwood grades:

**Premium Plus** is precisely what the name suggests. Profiles are of a 'clearer' visual appearance with fewer, smaller and sound knots.

**Premium** represents a good quality, sound timber with very acceptable and reasonably sized knot inclusion.

**Contract** is an acceptable quality timber but selected to be very price competitive. Knotting is liable to be more prevalent and likely not to be as sound (can become loose) as in the other grades. A good inexpensive option.

This guide uses coloured grade option symbols:

**Moisture content** Solid softwood, which is a natural product containing moisture, is dried artificially after the initial logging process, causing the wood to shrink. A certain amount of residual drying and shrinkage continues until stabilisation is reached. In a centrally heated home, lateral shrinkage of 2.5 – 3% is quite normal for new machined profiles.

**Finished sizes** Most sizes quoted are nominal, actual finished dimensions are given in the tables below unless specifically stated/listed against an item.

Nominal	Finished	Nominal	Finished	Nominal	Finished
9	6	38	33	138	133
12	8	50	44	150	144
13	8.5	63	57	175	169
16	12	75	69	200	193
19	14.5	88	82	225	216
22	19	100	95	250	241
25	20.5	115	108	275	266
32	27	125	120		(all sizes in mm)

† Certain small mouldings are only available in 2.4m lengths

**PSE**

<b>FINISHED</b> 19mm x 144mm 19mm x 144mm	<b>NOMINAL</b> 22mm x 150mm 22mm x 150mm
---	--

**Natural Shrinkage**  
In common with most replacement flooring, please be aware that the above products will shrink laterally by 2.5 – 3% when fitted in a normally centrally heated home. This normal occurrence should be considered if the flooring isn't going to be covered but remain visible.
