How to build Arbordeck

Are you a DIY enthusiast? Visit www.arbordeck.co.uk and download our How to Build brochure. Alternatively contact us by phone, fax or email for the brochure to be posted to you.

If you would like your deck professionally installed please contact us and we can put you in touch with a Timber Decking Association 'DeckMark™ accredited' installer.

The mark of responsible forest management

wood. for good.

DeckMark™ is a quality assurance scheme introduced by the Timber Decking Association to confirm manufacturers compliance with Best Practice guidance and all relevant British Standards. For further information please contact the TDA on 01977 558147.

Arbordeck uses timber from forest sources that are managed to strict international environmental standards.

The information contained within this publication is given in good faith. Every effort has been made to ensure that the guidance given is accurate and Arbordeck cannot accept any liability for loss or damage arising from the information contained herein. All photography and colours are reproduced as accurately as the print process will allow.

Timber is a natural product

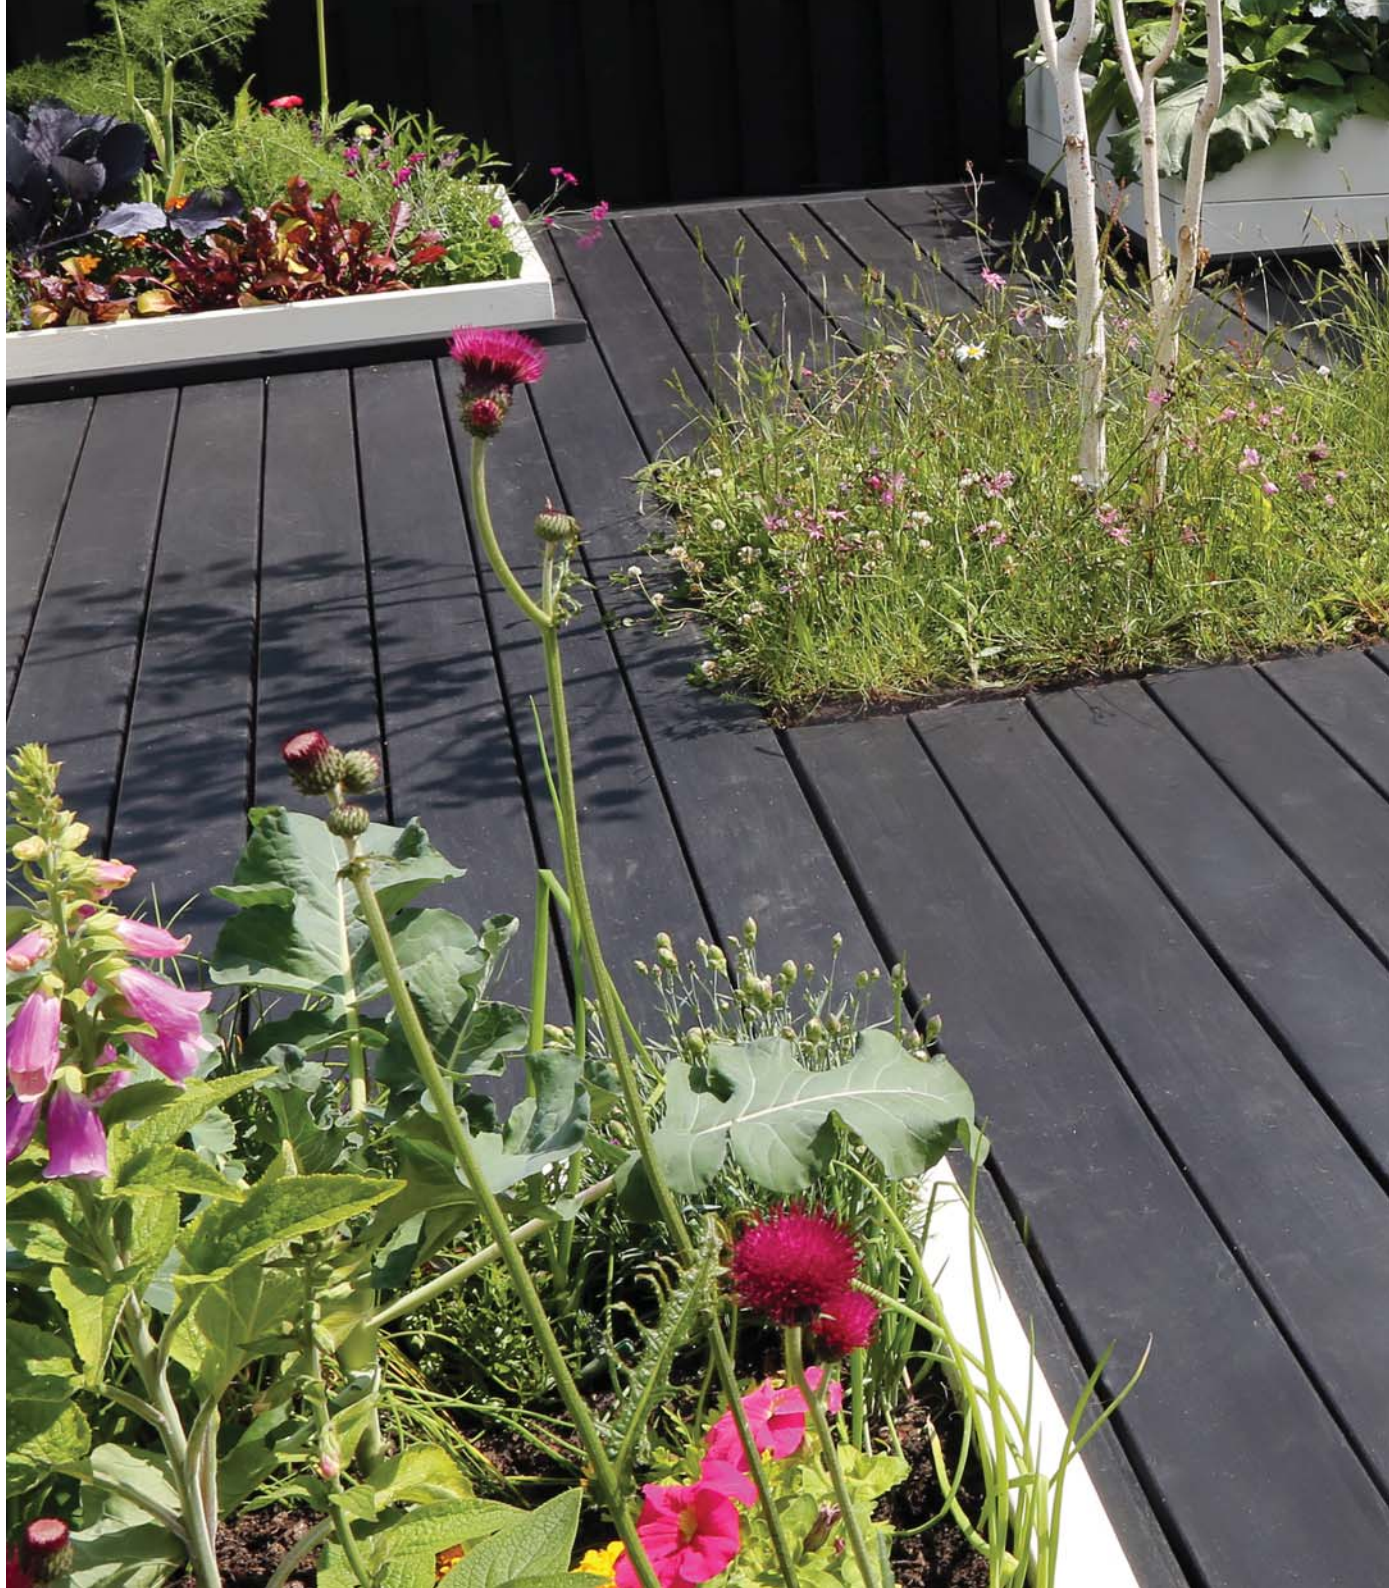

Arbordeck is manufactured from natural timbers and, when exposed to the elements, there may be some surface degradation, movement and checking due to the action of sunlight and moisture. This is a natural process and does not affect the strength of the timber.

The colour of your decking will change naturally over time too. Some options available are to apply a regular coat of maintenance oil; completely change your decks appearance with the addition of paint and stains or alternatively leave it to weather naturally to an attractive silver-grey.

Arbordeck would like to thank the following for their assistance in providing the projects photographed in this brochure:

- Atkins Vause, Blackburn
- Distinctive Landscapes, Mansfield
- Gisborne Homes, Derby
- GMS Leisure Ltd, Truro
- Halcyon Days, Nottingham
- Timberscapes, Sheffield
- Warwickshire Building & Maintenance Ltd
- Whalley Construction, Darwen

The installers whose projects are shown in this brochure are independently owned and operated, and are neither affiliated with nor agents or representatives of Arbordeck. Arbordeck makes no representations or warranties as to, and is not responsible for, the performance, acts or omissions of these installers.

Designed for living

Welcome to the 2013 Arbordeck® brochure, the first step in extending your home into the garden!

Manufactured by a British company with more than 170-years' experience in the timber industry, Arbordeck offers arguably the widest choice of decking products on the market.

The range includes smooth and grooved softwood boards, a choice of enhanced grip deck boards, joists and a wide selection of contemporary and traditional balustrades with a range of finishes for both commercial and domestic applications.

NEW for 2013
Enhanced Grip deck boards

See pages 14-15

smooth boards with inset feature
lights offer a dramatic solution

sustainable in every sense

Arbordeck is a founder member of Forests Forever, the environmental voice of the industry and we work closely with both FSC® and PEFC.

We're proud to be one of the few manufacturers to offer a full Chain of Custody Certified decking system.

This provides full traceability, ensuring that all of our products come from well-managed sources.

Sustainability is also about providing a deck that will look good for years to come. This is why we only use the highest quality European timbers from northern latitudes, where the wood fibres offer a closely packed structure and increased strength and stability.

We also treat all our softwood products in the Arbordeck range with Naturewood, an advanced preservative, including even the components you don't see when your deck is complete!

The mark of responsible forest management

Practical Solutions

Your Arbordeck deck can bring in to use difficult or inaccessible garden areas that would be near impossible to undertake with other landscaping materials.

The introduction of a relatively straightforward deck on a steeply sloping site can produce an area for relaxing and entertaining with excellent storage space below the deck.

So, whether you're looking for a practical and attractive solution for a balcony or a cost-effective alternative to a conventional lawn, decking can provide a year round extension to your living space and, with only minimal maintenance, will be as good in years to come as the day it was installed.

"My sloping garden has been transformed into an area where I can relax and entertain!"

Products to suit your style & budget...

Not only practical and cost-effective, with careful design decking can add real value to your home.

Clever changes of board direction, mixing smooth and grooved boards, introducing more than one deck level, creating shapes, careful selection of balustrade style or the addition of design features such as rope and deck planters will create an individual design statement.

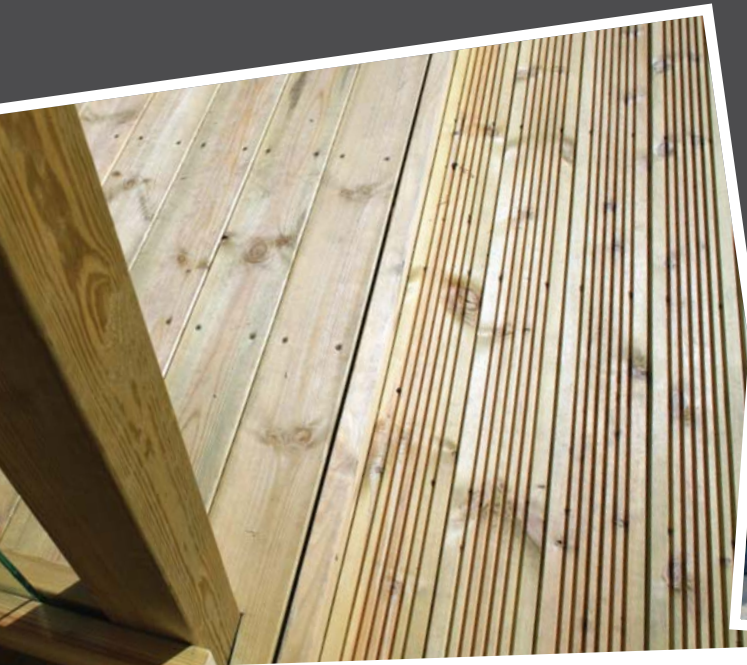

You can even add a simple gazebo using Arbordeck deck boards and support timbers.

The creative options are endless with Arbordeck!

arborail®
deck rails made easy

convenience in kit form

Arborail starter kits

Available in ten distinctive styles, the Arborail® range of starter kits include the handrail, two newel posts, base rail and a choice of spindles; all ironmongery, fixings, caps and fitting instructions - everything you need to complete your deck.

All Arborail kits are professionally boxed and are easier and more convenient to handle than loose railing products.

Each kit is designed for domestic decks with a deck board height of no greater than 600mm from ground level. For higher or commercial decks please consult Arbordeck or a TDA registered installer.

Overall finished size including two newels: approximately 1.98m.

Arborail extender kits

The ultimate in flexibility, Arborail extender kits can be added together to provide any desired rail length. Available in all ten designs, the kits comprise of a handrail, one newel post, base rail, a choice of spindles, all ironmongery and fixings, caps and fitting instructions.

Overall finished size including one newel: approximately 1.89m.

A wooden deck with a ramp and steps made of Arbordeck Enhanced Grip boards. The deck is made of light-colored wood planks. The ramp and steps are made of a textured material with a light-colored surface and a darker wood frame. The ramp is on the left side of the deck, and the steps lead down to a brick patio. In the background, there are wooden chairs and a railing.

Arbordeck Enhanced Grip boards are ideal for access ramps and steps

where safety is paramount...

*one strip reeded boards
are used in this college
breakout area*

Arbordeck offers a range of solutions for those areas where you need extra grip properties, such as steps and ramps, or even for a complete deck, particularly useful for schools and colleges.

All our enhanced grip products easily surpass the minimum requirement for 'low-slip potential' (see below).

You can also be assured of quality and longevity with all Arbordeck enhanced grip boards. Machined from high quality, slow grown joinery timbers and treated with Osmose Naturewood to protect against rotting and insect attack, they are sure to stand the test of time and require only minimal maintenance. For maintenance information please contact Arbordeck.

Low-slip Testing

To meet the HSE's recommendation for low-slip potential, products need to achieve a minimum reading of **36 on the pendulum test** in both wet and dry conditions. Arbordeck enhanced grip boards easily surpass this requirement.

One Strip Reeded

70 (dry) / 66 (wet)
(Pass rate: min. 36)

Two Strip Smooth

74 (dry) / 68 (wet)
(Pass rate: min. 36)

Two Strip Grooved

73 (dry) / 70 (wet)
(Pass rate: min. 36)
