OUR COMMITTED APPROACH

OUR VALUES

Quality

The quality control tests for our products are carried out as per the **European standard WPC EN 15534-5** and the **FCBA CTB** Decking & Cladding gold standard. These tests cover: colour retention over time, mechanical resistance, moisture take-up of the material and slip resistance.

Innovation

SYLNEO co-develops its products with **professional designers and layout specialists**. We research specific applications for our industrial customers who integrate composite wood into their finished projects. Our mastery of the manufacturing process allows us to **explore new areas of application**.

Sustainable development

Our products are 100% recyclable. We use **PEFC-certified timber from our French sawmills**. Our products are manufactured in France using green energy. They do not contain polluting additives such as glue. Our products are compatible with the HQE (**High Quality Environmental**) standard. All our products are **eco-designed and approved by ADEME (French Environment and Energy Management Agency)**.

Circular Economy

SYLNEO participates in the circular economy through its PEFC accreditation, incorporating the HQE standard, the 'green' environmental process, the association with 'Made in France' and the use of recycled polymer. This has been conducted with the financial support of ADEME"

* WE ARE ENDEAVOURING TO USE 100% OF RECYCLED POLYMER AS PART OF THE ECODSIGN PROJECT WITH ADEME.

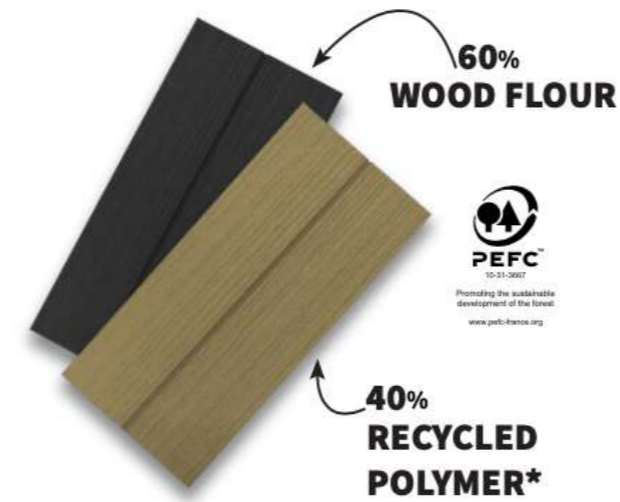

Service

We **provide technical assistance for our customers** and we examine their projects upstream in order to present them with a solution that is tailored and adapted to suit their specific needs.

20 YEAR WARRANTY*. THIS WARRANTY APPLIES TO BOARDS THAT HAVE SUFFERED STRUCTURAL DAMAGE DUE TO TERMITES, WOOD-DECAY FUNGUS OR SOFT ROT*.

MANUFACTURE

Our polymers provide SYLNEO products with **mechanical strength unequalled on the market**. Our control of the wood fibres prevents moisture uptake and abnormal expansion of our products. Our wood composites are 100% recyclable. They are made of **PEFC-certified timber from our French sawmills**.

ACCESSORIES

CLIPS

HALF-CLIPS

REVERSIBLE PLINTHS
(AVAILABLE IN 12X90 AND 22X145 MM IN THE SAME COLOURS AS OUR BOARDS)

4M COMPOSITE WOOD JOIST
(40 X 65 MM)

LACQUERED ALUMINIUM VENTILATION GRILL

ANTI-SLIP FLAT BOARD

ANTI-SLIP CORNER PROFILE

POWER TECHNOLOGY +

The **POWER PLUS** technology, a new generation industrial process **developed by SYLNEO**, gives our materials **the highest mechanical resistance on the market (strength, adhesion)**.

It allows us to answer all types of requests, especially for projects subject to constraints and high traffic (hotels, marinas, public places, etc.).

NOTE...

Given our boards are made of 60% wood, they will react quickly to the first UV exposure. You will notice a **slight bronzing of the surface of the boards**. This reaction is quite natural and will disappear within a few weeks.

SYLNEO
French manufacturer of eco-friendly composite wood

GÉMEUX BOARDS

THE GÉMEUX BOARD IS PRODUCED WITH A **BRUSHED AND ENGRAVED SURFACE EFFECT**. GÉMEUX BOARDS ARE AVAILABLE IN THREE FINISHES. THE GÉMEUX FIRST AND THE GÉMEUX BRUSH GIVE A **TRADITIONAL AND GROOVED APPEARANCE** WHILE THE GÉMEUX PRINT OFFERS A **NATURAL WOOD APPEARANCE**.

THE TRADITIONAL

BOARD LENGTH: 4 LM
BOARD WIDTH: 145 MM
BOARD THICKNESS: 21 MM

ATRIA BOARDS

THE ATRIA BOARD IS PRODUCED WITH A **SURFACE FINISH REMINISCENT OF THE GRAINED PATTERN OF WOOD**. LET YOURSELF BE SEDUCED BY THIS **ELEGANT BOARD WITH A VERY TRENDY, WARM AND AUTHENTIC FINISH**.

THE AESTHETIC

BOARD LENGTH: 4 LM
BOARD WIDTH: 165 MM
BOARD THICKNESS: 21 MM

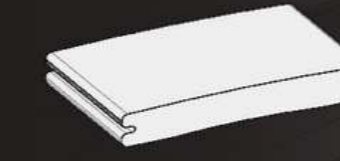

ORION BOARDS

THE ORION BOARD HAS A **ROUNDED FACE**, WHICH ENABLES FAST DRYING IN UNDER 15 MINUTES. IDEAL FOR POOLSIDE DECKINGS.

THE PROFESSIONAL

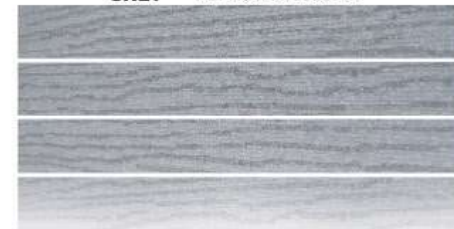

BOARD LENGTH: 4 LM
BOARD WIDTH: 165 MM
BOARD THICKNESS: 22 MM

-  FROST-RESISTANT
-  DRIES IN 1 H
-  SPLINTER-FREE
-  ANNUAL CLEANING
-  20-YEAR WARRANTY
-  ROT-PROOF
-  R12 SLIP RATED
-  DYED IN THE MASS
-  NATURAL APPEARANCE

ATRIA BOARDS COME WITH THE PROTECT OPTION...

THE PROTECT TECHNOLOGY IS AN INNOVATION DEVELOPPED BY OUR EXPERTS. IT IS UNIQUE ON THE COMPOSITE WOOD MARKET.

WHAT IS PROTECT TECHNOLOGY?

PROTECT boards are unique on the market. They are ecological and benefit from a **high performance industrial coating**. They are resistant to UV, have a water and oil resistant protective film and are easily cleaned. Over time, the boards can be touched-up (in case of impact) without any colour changes.

ORION LINE

GRAPHITE BLACK REF: 561230214400

STONE GREY REF: 561230212400

EXOTIC BROWN REF: 561230201400

OUR BOARDS ARE PERFECTLY SUITED TO A SEASIDE OR POOLSIDE INSTALLATION SINCE THEY ARE NOT AFFECTED BY CHLORINE OR BY SALT.
