PRODUCT GUIDE: Painted Timber Cladding

Freephone Hoppings Helpline 0800 8496339

Painted Timber Cladding

Q-Clad timber cladding is made from slow grown Scandinavian whitewood (Picea Abies).

It is kiln dried to a specific moisture content suitable for external cladding use and preservative treated to UC3C providing a 15 year warranty against fungal decay and insect attack (the warranty does not apply to the life of the paint coating).

Certified timber available certified on request.

Please enquire with your retailer if Chain of Custody is required.

Fine sawn finish provides great paint adhesion and great look.

Factory applied paint soon after timber processing provides best possible paint performance and finish for timber.

Rebated version provides quick and accurate fitting.

Q-Clad products have CladMark accreditation independently assessed by the Timber Decking & Cladding Association (TDCA).

Q-Clad pre-painted exterior timber cladding products can be used in most vertical exterior cladding situations.

They are designed to save time and provide a high quality painted finish that retains a natural grain appearance only timber can provide.

Factory applied paint provides the best possible paint

The products are essentially designed to be over-painted but this is your choice and not a requirement of the warranty.

We would recommend over-painting to hide the heads of fixings or any minor damage that may be incurred during fitting.

The white product is designed for over-painting with the colour of your choice.

We strive to provide conditions for the best possible paint adhesion.

The paint is a waterborne microporous system by Teknos, a well renowned Finnish commercial paint manufacturer.
