THE COLLECTION

Welcome to The Collection, a comprehensive range of beautifully crafted and stylish interior doors and accessories from Deanta. We pride ourselves on the quality and diversity of our doors. Each range has been carefully created to cater for the varying styles, trends and requirements to ensure we have a door for every home.

The Feature Collection includes our extensive door designs in a choice of real North American white oak or black walnut, light and dark grey ash veneers as well as white primed doors which are ready for a finish of your choice.

At Deanta, we understand the importance of design continuity. That's why The Collection includes a selection of premium handles and door hardware in a style and finish to suit your choice of door. We also offer skirting, architrave and door lining sets in oak, walnut and white primed finish to complete the look.

With The Collection you will be spoilt for choice. But if you are looking for a unique, statement door for your home check out our bespoke door design, glazing and finishing services within this brochure or on our website.

20 years' experience

Deanta offers over 20 years' experience in supplying internal doors and hardware.

Certification

We rigorously test and re-test all of our products. We hold certifications from Certifire, BM TRADA & Q-Mark.

Quality control

Deanta's quality control processes ensure provision of robust, solid core doors of the highest quality.

Manufactured by Deanta

Our doors are made in Deanta's own manufacturing facility.

In-house glazing centre

Glazed doors are cut and glazed in Deanta's own state-of-the-art glazing centre in Cambridgeshire.

Leading UK distributor

Deanta is one of the UK's leading distributors of premium internal doors, ensuring your order is delivered smoothly and efficiently.

Lippings

Deanta doors have one of the largest solid lippings in the UK interior door market.

Please refer to page 7 for trim allowance

Natural grain

All of Deanta's oak, walnut and light / dark grey ash doors have carefully chosen veneers.

Hand-picked veneers

Deanta doors are made using specially selected veneers from North America.

Why choose Deanta

We are not just another door company. We manufacture a wide range of beautifully designed stylish interior doors for the UK market. Our doors are made to the highest possible standard with only the finest materials paired with unsurpassed craftsmanship, ensuring you always get the best from your Deanta door. With over 20 years' experience in interior door design, manufacture and supply, Deanta has built a reputation for quality coupled with forward-thinking innovation.

Our commitment to quality

Customer satisfaction is Deanta's utmost priority. We achieve this by continuously pushing the boundaries to ensure that our products and services surpass the needs of our customers and inspire end-users. As a UK manufacturer producing doors, glazing options and ancillary products in-house we are able to ensure high quality production and an uninterrupted, managed supply chain. We are confident that every Deanta door is expertly made from quality materials, ensuring you get the best from your contemporary Deanta door.

Deanta produce robust, solid core doors that are finished with specially selected crown cut and diamond cut veneers from North America. Our prefinished black and white primed doors also feature solid cores providing extra strength and stability, making them the best in the UK market. With one of the largest solid lippings available in the UK internal door market, our doors can be adapted to fit into any sized opening. Our oak, walnut, light / dark grey ash and white primed doors can have a total of 32mm taken off the width and height of the door. For our fire doors 30mm (total) can be taken off the width and height of the door, Urban Collection 6mm (total) and 6mm (total) on our Architecture range.

Our design team take inspiration from the latest interior design trends to create new, exciting styles to add to our ever-growing collection. And our rigorous testing procedures ensure that only the best doors make it to market.

Our commitment to safety

Fire safety is at the core of our business. Deanta fire doors are extensively tested by independent third-party certification schemes to ensure the maximum level of safety. All our fire doors are BM TRADA Q-Mark and a selection of doors have Certifire accreditation too.

Our commitment to the environment

We are passionate about protecting the environment and our planet. We are constantly pushing the boundaries to ensure that, as part of our corporate social responsibility, we develop ways to reduce, reuse and recycle the waste we use. Our vision is to revolutionise the door industry and we have a strong set of beliefs that run through everything we do.

FOLDING SYSTEMS (BIFOLD)

Deanta Folding Systems (Bifold) offer flexible room divider solutions, allowing you to enjoy both large open-plan living areas and more intimate, segmented spaces. With a wide choice of door designs and finishes from the Deanta range and 12 opening configurations, a Deanta Folding System can be created to suit any home.

Featured: **Coventry walnut clear glazed** - Configuration 3 + 0 Handle: **Fortuna satin finish** (page 176) Skirting and architrave: **Shaker white primed** (page 172)

Featured: **Montreal light grey ash clear glazed** - Configuration 2 + 2 Handle: **Round flush handle matt black finish** (page 188) Skirting and architrave: **Shaker white primed** (page 172)

WHAT'S INCLUDED

- Configuration of your choice
- Top track only system
- Door frame
- Packing battens and covers
- All functional hardware
- Deanta 10 year warranty*

*only valid if Deanta doors are used in the system

Doors sold separately.

ADD-ONS

- Door design of your choice*
- Door handles
- Additional ironmongery
- Skirting and architrave

*(Doors with raised mouldings are not suitable for this system)

Folding Door Systems (Bifold)

Deanta Folding Systems can bring the flexibility to a property that is not always afforded by merely using walls to separate rooms. The flow of air and light into your living space can also be increased by using Deanta's clear glazed internal doors within our folding systems.

Deanta's stylish room dividers are a complete off-the-shelf solution allowing you to quickly and easily install your chosen configuration. We have specially designed and rigorously tested the track and bearings to ensure they can withstand the solid, robust construction of a Deanta door, resulting in doors that effortlessly glide across the system every single time, and will last for years to come.

Deanta folding system hinges allow for the system to be easily adjusted without removing the doors. The packing batten and cover are our own design and hide the track and mechanisms – this is unique to Deanta. The covers, packing battens and frames come in a choice of prefinished oak, walnut or white primed, and are also included on purchase.

For further information visit our website at deanta.co.uk

SELECT OPENING WIDTH AND CONFIGURATION

Door width (MM)		Configurations	
610	686	LEFT	RIGHT
Structural opening width (MM)			
1295	1447		2 + 0
1908	2136		3 + 0
1908	2136		2 + 1
2521	2825		2 + 2
2521	2825		4 + 0
2521	2825		3 + 1

Outer frame height can be adjusted between 2050mm and 2060mm dependent on flooring detail.
Linings are supplied oversize to allow them to be cut to suit.

CHOOSE YOUR DOOR DESIGN

Deanta Folding Systems offer you the freedom to choose from a variety of doors from the Deanta range to achieve your desired look. The doors above are the most popular choices. We supply door linings in oak, walnut and white primed finishes to complement your door selection and complete the folding system.

POCKET DOORS

Maximise every inch of your home with the innovative Deanta Pocket Door Systems. In a world where space is at a premium, these doors offer the ultimate solution. By eliminating the need for a door swing, you gain valuable room to arrange furniture with ease, create additional functional spaces, or simply enjoy more open and unobstructed areas.

Gone are the days when pocket doors were confined to small cupboards or utility rooms. Embrace a new era of design by incorporating Deanta double pocket doors, transforming transitions between dining rooms, living rooms, or kitchens.

Elevate your interior and unlock the potential of your living spaces with this remarkable space-saving feature. Upgrade to Deanta Pocket Door Systems today and experience a whole new dimension of spaciousness.

Featured: Amalfi oak clear glazed with oak frame

Pocket Door Systems

Deanta Pocket Door Systems neatly conceal internal sliding doors within the wall cavity, creating a significant impact on both usable space and perceived available space. This increases flexibility and makes the room feel lighter and airier.

Designed to work in partition walls, each pocket door system comes with a pre-assembled aluminium track and header mechanism, allowing for stable and smooth sliding of the door along the track. The metal pocket frame clicks together for easy installation within your home.

Deanta Pocket Door Systems are compatible with the majority of Deanta doors - including The Urban Collection doors - and include all the necessary hardware. In particular, the door jambs included in the system, will provide the finishing touch that you need to conceal the sliding system.

Our pocket door system can be upgraded with add-ons such as a soft close, a simultaneous closing kit or a bathroom lock.

For further information visit our website at deanta.co.uk.

FIRE SAFETY

Deanta's range of FD30 and FD60 fire doors surpass the current UK fire door regulations. By manufacturing every Deanta door in-house, we maintain complete control over materials, construction, and quality at every stage, ensuring full traceability from start to finish. Through ongoing investment in research, development, and testing to EN 1634-1, we deliver some of the most reliable and rigorously built fire doors on the market today.

FD30 FIRE DOORS (30-MINUTE FIRE DOORS)

Deanta FD30 fire doors are designed to withstand fire and smoke for a minimum of 30-minutes, protecting vital escape routes and compartmentalising spaces in both homes and commercial buildings. Every FD30 fire door in our collection is third-party certified and tested to EN 1634-1 standards, whilst crafted from a high-density solid core for strength, durability, and reliable fire performance.

Our fire doors offer dependable performance, backed by consistent third-party certification. Many of our FD30 doors are also available with fire-rated glass, giving you flexibility to introduce natural light

and contemporary design without compromising on safety. With a wide choice of finishes and glazing options, our FD30 range blends compliance, quality, and design versatility in one trusted solution.

To find a FD30 Fire Door check for the 🔥 on the product page of this brochure.

An example of our range of solid and glazed feature doors. All doors available as an FD30 door are noted on the individual product pages

FD60 FIRE DOORS (60-MINUTE FIRE DOORS)

Deanta FD60 fire doors are designed to withstand fire and smoke for a minimum of 60-minutes, providing vital protection in higher-risk areas and meeting enhanced fire safety requirements. Suitable for larger residential developments, commercial buildings, and specialist regulatory applications, every FD60 fire door in our collection is third-party certified to EN 1634-1 standards and accredited under both Q-Mark and Certifire schemes for proven performance and full traceability.

Crafted with reinforced solid cores and precision engineering, our FD60 fire doors deliver maximum integrity in extreme conditions. Available in a wide range of finishes and styles, they combine reliable fire protection with the same design flexibility and installation efficiency you expect from Deanta.

Our Certification

At Deanta, safety and performance come as standard. Every internal FD30 and FD60 fire door in our collection is third-party certified and tested to EN 1634-1, ensuring full compliance and dependable protection across residential and commercial projects.

Our third-party certification partners include BM TRADA Q-Mark and Warringtonfire Certifire, so you can be confident that every door is independently assessed to meet the highest industry standards.

BM TRADA Q-Mark

Operated by BM TRADA, the Q-Mark scheme is based on the internationally recognised EN ISO/IEC 17065 certification standard. It confirms that a fire door has been independently tested and assessed to meet the requirements of a specific technical specification.

Certified products are typically marked with a Q-Mark plug or identifier on the top edge of the door and supporting documentation such as datasheets are available for traceability and compliance.

Certifire

Certifire is an independent third-party certification scheme run by Warringtonfire Testing and Certification Ltd and accredited by UKAS. It ensures that fire protection products, including fire doors, have been rigorously tested for safety, reliability, and performance.

Certifire-certified doors carry a unique label on the top edge, and datasheets are provided to help verify compliance and support correct installation.

FIRE DOOR DATASHEETS FOR EVERY INSTALLATION

Every Deanta fire door is supplied with a detailed datasheet, regardless of the certification scheme it falls under. These datasheets contain essential product specifications, performance ratings, and certification details to ensure the door is fitted correctly and remains compliant throughout its service life.

By keeping this documentation with the door, you have a clear reference for inspections, maintenance, and future safety checks, giving peace of mind that your fire door meets all required standards.

& CERTIFIRE FIRE DOOR DOCUMENTS

HOW TO IDENTIFY Q-MARK FIRE DOORS

The plug to identify a Q-Mark accredited product will be located on the top of the door. The unique certified company number in the centre of the tree maintains traceability for which company was responsible for completing each part of the doorset manufacture, assembly and installation process. The unique number provides traceability to the Q-Mark scope certification.

Deanta is an approved door leaf and/or frame manufacturer.

 **30 minutes**

 Approved door leaf and/or frame* (FD30 & FD60 only). Intumescent strips prepared for & supplied.

 Approved factory fitted glazing.

 **60 minutes**

 Approved door leaf and/or frame* (FD30 & FD60 only). Intumescent strips not supplied.

 Complete certified factory hung doorset.

THE FEATURE DOOR COLLECTION FIRE & ACOUSTIC SEALS

LORIENT

LORIENT LAS 1212 BATWING® PVC with Elastomeric Fins

An acoustic and smoke perimeter seal which minimises the opening and closing resistance of the door leaf due to its unique, curved fins. Flexible elastomeric fin material springs back to original shape to provide ongoing performance and durability in service. Installed at the head and jambs of single and double leaf doors.

- 12mm x 12mm x 2100mm
- Durability: minimum of 100,000 cycles
- Suitable for FD30 and FD60 Doors 🔥

LORIENT LP1504 FIRE SEAL PVC Encased Sodium Silicate

Our intumescent fire door seals offer fire protection where no smoke sealing is required. Combine a fire seal with a Batwing® seal for acoustic and smoke containment.

- 15mm x 4mm x 2100mm
- Available in a black or white finish
- Suitable for FD30 and FD60 Doors 🔥

LORIENT LP1504 DS ACOUSTIC, SMOKE & FIRE SEAL

PVC with elastomeric fins: DS door seal offers the ultimate in acoustic, smoke and fire protection, with the added benefit of thermal containment. Its unique design means that whichever way round the product is installed, the seal can always be fitted in the correct place, maintaining the integrity of the acoustic and smoke seal at the ironmongery points.

- 15mm x 4mm x 2100mm
- Available in black and white finish
- Suitable for FD30 and FD60 Doors 🔥

LAS8001 LORIENT SI DROP SEAL Aluminium with Silicone Rubber

Aluminium based drop seal for acoustic, smoke and energy containment. Features a high efficiency mechanism which lifts the seal clear of the floor as soon as the door is opened. Fitted onto single swing doors, for use on both right and left-handed doors.

14mm x 35mm x 735mm
14mm x 35mm x 835mm
14mm x 35mm x 935mm

- Self-levelling on uneven surfaces
- Suitable for FD30 and FD60 Doors 🔥

*Seals are available in Acoustic or Acoustic & Fire Door Kits

BESPOKE

Your door. Your size. Your style. Our pleasure.

Every project is different, and so is every Deanta door. Our bespoke service gives you the freedom to customise any design to your exact specifications, allowing you to create something entirely original.

With expert craftsmanship and meticulous attention to detail, we bring your vision to life, delivering doors that are as unique as the spaces they complete.

BESPOKE FEATURE DOORS

Our Feature Collection isn't the limit of what we can offer, for those renovations or builds that require unique specifications and extra attention to detail our bespoke service is the perfect option for you. Choose a bespoke size of any door in this brochure or design one yourself and our skilled craftsmen will bring your ideas to life.

BESPOKE FIRE DOORS

We offer bespoke sizing across our range of fire doors, giving you the flexibility to find the right door to meet your specifications.

Get in touch with your local stockist to find out more information.

CREATE YOUR BESPOKE DOORS

IN 4 SIMPLE STEPS

STEP 1

Contact your local stockist with your bespoke door request.

STEP 2

We will send a quotation and lead time to your stockist to share with you.

STEP 3

Your stockist will receive a technical drawing for your approval. Once approved, your door will proceed into production.

STEP 4

Your bespoke door will be delivered to your stockist for collection or directly to your home.

BESPOKE GLAZING

Deanta's state-of-the-art glazing centre in Cambridgeshire offers a broad selection of vision panels for prehung doorsets and door kits.

Choose from 14 different glazing aperture options or bespoke glazing, all of which are available with standard non fire-rated glass, acoustic-rated glass or for fire-rated doorsets we offer Pilkington Pyrodur®, Pyroguard Advance and Pyrostem fire-rated glass. Frosted glazing (standard or fire-rated) is available on request.

DOOR OPTIONS

Choose from a range of specially selected doors to glaze. Doors that can be customized are identified on each of the product pages. For more details on our door options, get in touch with us today.

GLAZING OPTIONS

Choose from a range of different glazing types, standard clear glazing / FD30 / FD60 clear, FD30 wired or frosted.

FD60 clear

FD30 Clear

FD30 wired

FD30 Frosted

TRUSTED PARTNERS

Our fire-rated clear glazing uses Pilkington Pyrodur® for 30-minute and 60-minute applications, and Pyroguard Advance for 30-minute applications.

Pyroguard

The world's leading independent provider of fire safety glass for timber door applications.

Sealmaster

Sealmaster are manufacturers of intumescent fire and smoke seals, acoustic, draught and weather seals, fire glazing and structural fire safety as well as bespoke solutions.

OUR CERTIFICATIONS & PARTNERS

At Deanta, we take pride in working to the highest standards. Our certifications represent our commitment to quality, sustainability, and safety in everything we do. Each partner we work with shares our values, helping us deliver trusted, responsibly made products to our customers. Together, they strengthen every aspect of what we stand for: craftsmanship, innovation, and integrity.

The mark of
responsible forestry
FSC® C132132

SUSTAINABILITY COMMITMENT

All our doors are sustainably source and certified by the Forest Stewardship Council® (FSC®). We are able to trace the timber we source to managed forests, ensuring our products are sustainably sourced, even those which do not carry a FSC® certification.

It is our responsibility to ensure that we use timber from forests that adhere to best practices and recognised schemes. These practices maintain forest biodiversity, productivity, and ecological processes while also protecting the rights of local people. We focus on sustainability throughout our business.

ISO 14001 – ENVIRONMENTAL MANAGEMENT

At Deanta, we are committed to responsible manufacturing and reducing our environmental impact. That's why our operations are certified to ISO 14001, the internationally recognised standard for environmental management.

ISO 14001 provides a framework for managing environmental responsibilities, helping us:

- Minimise waste and energy use across production
- Reduce our carbon footprint and impact on natural resources
- Ensure compliance with environmental legislation
- Continuously improve our sustainability performance

This certification demonstrates that Deanta doesn't just make premium internal doors — we do so in a way that prioritises the planet and supports a sustainable future.

IMPORTANT INFORMATION

We offer a limited ten-year warranty on all our doors within our T&Cs. Any Deanta door that warps* or splits will be covered by our warranty once it has been deemed that the installation has met all guidelines. Please note colour variance in the wood is not considered a manufacturing fault as it is a natural product.

THE FOLLOWING MUST BE CARRIED OUT TO ENSURE THE BEST PERFORMANCE FROM YOUR DEANTA DOOR

- All doors must be examined immediately on receipt. The customer shall be deemed to have accepted the Products as being in conformity with the contract once the POD is signed. A valid signature is required upon delivery. We do not accept “not checked” or “unchecked” or “not opened” or any similar statement. If there are any discrepancies with the delivery this needs to be noted on the POD.* This excludes manufacturing faults that occur after hanging. Scratches on glass are not considered a manufacturing fault. Scratches found should be reported on receipt and prior to installation.
- Doors must be stored horizontally on a clean, dry, flat and level surface.
- For doors to acclimatise, they should be left in the house prior to installation for at least seven days with the ambient temperature gradually increased over this period.
- Doors must not be fitted in a house that is freshly plastered and doors should only be delivered to site after all wet trades are finished and sufficiently dried. A moisture reading taken by an engineer must be recorded.
- Should a door require alteration, cutting or planing, it must be immediately revarnished to prevent moisture absorption which may lead to warping or splitting.
- Take no more than the recommended allowance off the width and height of doors in equal amounts on all edges. Please refer to <https://deantawood.co.uk/products/> for further details on trimming allowances across our range of doors.

- Three coats of internal wood finish are required on unfinished doors and on any modifications to a prefinished door including planed edges and the ironmongery and hinge cut-outs.
- To ensure the best finish on our White Primed doors, we would suggest using a fine sand paper to smooth any roughened surface/excess primer and then completing with one to two coats of your chosen finish. Remember to also treat any altered/trimmed areas too, sealing against any moisture.
- We recommend varnish and lacquers that are suitable for internal joinery. If using oils please contact Deanta for recommended brands.
- All doors must be installed with three hinges per door.
- Ten-year warranty on hardware (handles and locks) refers to mechanical faults. General wear and tear from use is not covered by this warranty.
- Our veneers are manufactured from North American timber and as such will display natural variations in colour and grain patterns which may include small knots. Further details of our limited warranty can be found on our website along with our returns policy. *T&Cs applicable

* Warp/bow/cup/twist (as set out in the relevant British Standard) shall not be considered a defect unless it exceeds 1/4 inch (6.35mm) in the plane of the door itself. Warp is any distortion in the door itself and does not refer to the relationship of the door to the frame or jamb in which it is hung.

UNDER OUR WARRANTY, OUR LIABILITY IS LIMITED TO REPLACING THE DOOR AND NO LIABILITY IS ACCEPTED FOR ANY CONSEQUENTIAL COSTS. ALTERATION OF A DEANTA DOOR WILL VOID THE WARRANTY.

All Deanta UK fire rated products must be used in accordance to the relevant fire certification. Any deviations outside of the scope of certification will invalidate any warranty and/or stated fire performance.
